

Automation Engineer - DCS

Are you ready to shape the future of automation solutions for the pharmaceutical industry? Are you passionate about software development and DCS programming? Do you thrive in an informal, collaborative environment where you'll have responsibility, influence, and opportunities for growth? Then you might be the perfect fit for us.

We're expanding and currently looking for automation engineers for our offices in Lynge and Kalundborg. As part of our project team, you'll work closely with customers in the pharmaceutical industry to develop innovative automation solutions.

Your New Role as an Automation Engineer at Init

As an automation engineer, you will play a key role throughout the entire project lifecycle – from initial customer meetings to design, programming, implementation, testing, and handover.

Your main responsibilities will include:

- Designing, programming, and implementing DCS systems and automation solutions
- Troubleshooting, optimizing, and maintaining software and equipment
- Collaborating with both internal and external stakeholders to ensure smooth integration of automation solutions
- Developing and documenting automation strategies and procedures

Who Are You?

We're looking for a technically driven individual who is passionate about automation solutions and project work, and eager to take on responsibility. Ideally, you have:

- An educational background in engineering, marine engineering, automation technology, or a similar field
- Experience with DCS, Sattline, or 800xA
- Experience designing and implementing control systems in a Pharma/GxP environment
- A structured and analytical approach to problem-solving
- Strong communication skills and the ability to work cross-functionally

Why Join Init?

At Init, you'll be part of a company that prioritizes development, flexibility, and collaboration. We offer:

- Exciting automation projects within Life Science
- A competitive salary package
- Flexibility and autonomy in managing your work
- Professional and personal development through training, mentoring, and challenging projects
- A strong team culture supported by social events such as ski trips, Friday breakfasts, barbecue nights etc.

Who Are We?

You'll join Init – a fast-growing company with the ambition to bring together the best companies and people in Industrial IT and Automation. We are currently around 450 employees across more than 20 locations in Denmark. We are committed to creating a fun, safe, and inclusive work environment. Our motto – "We are Init together" – reflects how we collaborate with colleagues to make Init an attractive workplace, and with customers to shape the future of Industrial IT and Automation.

Are You Our New Automation Engineer?

We look forward to hearing from you! Apply by filling out the form and uploading your CV and, if desired, a cover letter.

If you have any questions about the position, feel free to contact Uffe Monberg, Director Life Science, at umon@initgroup.com or Martin Leifelt, Commercial Manager, Life Science.
